About me

I am a full stack web developer with experience in JavaScript, React, Redux, NodeJs, ExpressJS, postgreSQL and mongoDB. I have worked on challenging projects, such as the creation of a country application and a website focused on animal adoption among others, in which I have applied my technical skills to create effective solutions. Additionally, I've collaborated as a team with other developers and designers to deliver high-quality projects and have developed valuable interpersonal skills in the process. I am currently expanding my knowledge in TypeScript, Nextjs, material-mui, graphQl and looking to continue growing as a developer to achieve my long-term goals in the field of technology.

RELEVANT SKILLS

- JavaScript
- React
- Redux, Redux Toolkit
- Nodejs, Express
- MongoDB, PostgresSQL

PROYECT EXPERIENCE

BACKEND - Huellitas de amor

Website dedicated to animal adoption with a group of eight (8) people. With creative thinking, problem solving, teamwork, communication and autonomy.
I developed the backend together using technologies such as Node, Espress and PostgreSQL.

Full Stack - Ecommerce App

An ecommerce application based on technologies such as JavaScript, React, Node.js, Express and MongoDB. It includes features such as authentication with JWT, payment gateway integration with Braintree, dashboard for administrators and users, shopping cart, category and product management, and order history section for users and administrators. This project seeks to provide a complete solution for the creation of an online store.

Full Stack - Countries App

Design and develop an App of countries that included: searches, filtering, sorting and creation.
Develop the app using for the Front React, Redux, pure CSS and Back developed in Node.js with Express. Database in PostgreSQL and Sequelize.
