FEATURED PROJECTS

ChessFive — Real-Time Multiplayer Chess Platform

Current version: [Node.js](#) · [Express](#) · [MongoDB](#) · [Redis](#) · [Flutter](#) | Original web version: [React](#) · [Node.js](#) · [Express](#) · [MongoDB](#) · [Socket.IO](#) · [JWT](#)

- Built the original real-time web chess platform and evolved the project toward a new multiplatform version.
- Current development includes authentication, multiplayer matches, ranking and progression, and real-time functionality.
- The current version is in active development, staging and internal testing.
- An earlier version was published on Google Play; the current version is not publicly available there.

EarnFive — Rewards Platform

[TypeScript](#) · [Flutter](#) · [MongoDB](#) · [Redis](#) · [Docker](#)

- Developing a rewards platform with Argon2id/JWT authentication, user profiles, device controls and antifraud mechanisms.
- Implemented wallet and transaction flows, survey/offerwall integration and withdrawal workflows.
- Added AES-256-GCM protection for sensitive payout information, administrative audit activity, notifications, health/readiness endpoints, rate limiting and automated tests.
- Currently in active development and internal testing.

ClashCycle — Mobile Loan Management Application

[Flutter](#) · [Dart](#) · [Python](#) · [FastAPI](#) · [MongoDB](#)

- Developed a mobile loan management application for a client in the informal financial sector.
- Implemented client registration, interest-bearing loan creation, payment tracking and outstanding balance calculations.
- Built the mobile frontend in Flutter and the REST backend with FastAPI and MongoDB.
